Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Serial-to-Parallel Logic Converter competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A serial-to-parallel logic converter is an integrated circuit or digital module that receives serial data streams and converts them into multiple parallel output bits using shift registers, latches, and logic decoding. It is widely used in embedded systems, industrial automation, communication interfaces, LED drivers, display modules, and microcontroller-based applications. In 2024, global serial-to-parallel logic converter production reached approximately 1.35 billion units, with an average global market price of around US\$0.22 per unit. The global serial-to-parallel logic converter industry generally maintains a gross margin of 28%–42%, supported by low-cost semiconductor fabrication, packaging efficiency, and high-volume demand. The supply chain of serial-to-parallel logic converters includes upstream suppliers of semiconductor wafers, logic IC designs, packaging materials (QFP, SOP, DIP, SMD), and testing equipment. Midstream manufacturers conduct wafer fabrication, packaging, testing, and logic configuration. Downstream users include embedded system manufacturers, industrial equipment makers, consumer electronics brands, communication device factories, and PCB assembly companies. The serial-to-parallel logic converter market is driven by miniaturized electronics, rising embedded system demand, and increasing use of LED displays, smart appliances, and communication devices. Key trends include lower-power CMOS logic, compact SMD packaging, higher data-rate converters, and integration into multifunctional logic ICs.

The global Serial-to-Parallel Logic Converter market size was estimated at USD 297.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

6.40% during the forecast period.
