Abstracts

Serialization as a Service is a flexible solution designed specifically for the pharmaceutical industry to meet the stringent requirements of regulatory agencies such as the European Union for anti-counterfeiting and traceability of pharmaceutical packaging. The service ensures that each product can be traced back to its manufacturer by providing each pharmaceutical package with a unique and traceable serial number and barcode. Given the complex laws and regulations and high equipment investment costs faced by the pharmaceutical industry, as well as the expertise required in the serialization process, Serialization as a Service provides a cost-effective and easy-to-integrate solution. Manufacturers do not need to bear the development and maintenance of serialization systems themselves, but can seamlessly integrate them into their own logistics chains, allowing them to focus on their core business while ensuring compliance and product quality.

The global Serialisation as a Service market size was estimated at USD 1257.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
