## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on SFP28 Active Optical Cable (AOC) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global SFP28 Active Optical Cable (AOC) production reached approximately 2,348 K units, with an average global market price of around US\$ 135/unit. SFP28 Active Optical Cable (AOC) is an SFP-family, hot-pluggable direct-attach optical cable assembly that integrates an SFP28-form optical transceiver at each end permanently mated to a short length of fiber and active electronics ? effectively a factory-terminated, fixed-length optical link optimized for 25Gb/s single-lane links. Upstream inputs include optoelectronic components , optical subassemblies, transceiver driver/TIA/CDR ICs, fiber (OM3/OM4 MMF or single-mode options for special lines), PCB/cage and connector hardware, and automated assembly & test equipment. Downstream applications are data-center server-to-switch and switch-to-switch interconnects (ToR / leaf-spine), 25G server NICs, storage/SAN links and telecom fronthaul use cases that accept SFP28 ports. The production capacity of a single line is highly dependent on the level of automation, with semi-automated lines far lower than highly automated multi-line plants. Product gross profit margins typically range from 15% to 40%.

The global SFP28 Active Optical Cable (AOC) market size was estimated at USD 317.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 11.90% during the forecast period.
