Abstracts

The sharing economy is a new economic model that efficiently matches the supply and demand of idle resources, skills or services through digital platforms. Its core lies in the separation of ownership and use rights, covering areas such as travel (such as Uber, Didi), accommodation (Airbnb, Tujia), office (WeWork), and labor (Meituan crowdsourcing). The driving forces for the growth of the sharing economy include technological progress (5G, AI algorithms to optimize resource matching), consumer demand for flexibility and cost-effectiveness (such as Generation Z preferring "use rather than ownership"), and the promotion of the reuse of idle resources under the goal of carbon neutrality (sharing cars reduces carbon emissions by 30%). However, the market faces challenges such as unstable profit models (such as early losses in shared bicycles), regulatory games (data security and labor rights disputes) and homogeneous competition. In the future, the industry will evolve towards vertical segmentation (such as shared medical equipment, laboratory capacity) and ecological integration (travel + local life service closed loop). North America, China and Europe will still be the main battlefields, while emerging markets such as Southeast Asia and Latin America have highlighted their potential under policy relaxation.

The global Sharing Economy market size was estimated at USD 7356.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 18.20% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Sharing Economy market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Sharing Economy market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the Sharing Economy market.

Global Sharing Economy Market: Market Segmentation Analysis

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.
