Report Overview

A Short Range Air Defense (SHORAD) system is a military system specifically designed to provide protection against low-altitude aerial threats, such as helicopters, unmanned aerial vehicles (UAVs), fixed-wing aircraft, and cruise missiles. These systems are used to defend critical assets, military installations, and ground forces from aerial attacks in close proximity. Short range air defense (SHORAD) is a group of anti-aircraft weapons and tactics that have to do with defense against low-altitude air threats, primarily helicopters and low-flying aircraft such as the A-10 or Sukhoi Su-25. SHORAD and its complements, HIMAD (High to Medium Air Defense) and THAAD (Terminal High Altitude Area Defense) divide air defense of the battlespace into domes of responsibility based on altitude and defensive weapon ranges.
