Abstracts

A Short Video E-commerce Live Streaming Platform is a digital platform that integrates short video content, livestream interaction, and e-commerce transaction capabilities. Users can browse products, consult interactively, and place orders instantly through watching short videos or livestreams. The platform integrates modules such as content distribution algorithms, livestream streaming systems, e-commerce transaction systems, payment settlement, data analysis, and user profiling, creating a new retail ecosystem where "content is the channel, and interaction is the conversion." Short video e-commerce live streaming platforms typically integrate a complete set of e-commerce transaction modules, including product display, shopping cart systems, coupon distribution, payment interface access, and order management, achieving a closed-loop transformation from content to transaction. Furthermore, the platforms offer a wealth of interactive features, such as bullet comments, likes, comments, raffles, live broadcasts, and voting, enhancing user engagement and retention. Regarding data analysis, the system supports real-time monitoring and optimization of key metrics such as GMV (gross merchandise volume), conversion rate, user retention time, repurchase rate, and ROI, providing merchants with a basis for precise operational decision-making.

The global Short Video E-Commerce Platform market size was estimated at USD 574000.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 15.00% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Short Video E-Commerce Platform market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.
