### Report Overview

Stretch films are stretchable plastic films that are commonly used for packaging bulk items by wrapping around palletized loads together. Due to its tough and strong characteristics, stretch packaging is used in transportation and storage applications. Shrink films find wide usage in packaging of food items and other consumer goods. Commonly used in retail stores to pack a single product or a cluster of smaller products together.

Much of this growth can be attributed to factors like the high efficiency of film manufacturing and layering, growing sales of retail items, and the increasing use of stretch and shrink hoods and beverage and pallet unitization wraps
