## Abstracts

Shuttering oil, also known as formwork oil or mold release agent, is a specialized liquid used in the construction industry to prevent concrete from sticking to the molds or formwork during the casting process. It's applied to the inner surfaces of the formwork (which can be made of wood, metal, or plastic) before the concrete is poured in. The purpose of shuttering oil is to facilitate the easy removal of the formwork once the concrete has hardened, ensuring a smooth finish on the concrete surface and reducing damage to the formwork, which can be reused.

The global Shuttering Oil market size was estimated at USD 382.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.60% during the forecast period.
