Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Si-PIN X-Ray Detector competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Si-PIN X-ray detectors use silicon PIN photodiodes as detection elements, along with low-noise preamplification and temperature-controlled heat dissipation for soft and hard X-ray energy spectra and counting. They are mainly used in X-ray fluorescence analysis, laboratory spectrometers, portable alloy analyzers, some medical imaging modules, and aerospace particle/astronomical detection. Global shipments in 2024 are estimated to be approximately 50,000 units, with an average unit price of approximately US\$2,500 per unit in 2024 and a single-line production capacity of approximately 10,000 units per year. Upstream companies are concentrated in silicon wafer and semiconductor manufacturing, photodiode chip processing, low-noise JFET and front-end electronics, thermoelectric cooling modules, and packaging and testing supply chains. Downstream companies are Portable XRF handhelds, desktop XRF/spectrometers, laboratory spectrometers, dental/small medical imaging modules, security inspections and aerospace exploration, etc. For example, the downstream consumption is that each portable XRF uses 1 Si-PIN detector, each desktop or tableside spectrometer usually uses 1 to 2 detectors, each small medical imaging module usually uses 2 detectors, and each scientific research satellite or high-end detector payload may be equipped with about 4 detectors. According to a similar formula, it can be understood that 1 portable XRF consumes 1 Si-PIN, 1 desktop spectrometer corresponds to 1 to 2 Si-PINs, and 1 dental CBCT corresponds to about 2 Si-PINs. The gross profit margin is estimated to be about 45%.

The global Si-PIN X-Ray Detector market size was estimated at USD 125.0 million in

2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.30% during the forecast period.
