Abstracts

Inspection and metrology are becoming more critical in the silicon carbide (SiC) industry amid a pressing need to find problematic defects in current and future SiC devices. Demand for SiC wafers is growing rapidly and production needs to keep up. Speeding up production can result in higher defect rates without the proper inspection equipment in place during the R&D process, where poor verification of your process tools can dramatically reduce yield. Global key players of SiC Wafer Defect Inspection System include KLA Corporation, Lasertec, Bruker, Visiontec Group, TASMIT, Inc., etc. The top five players hold a share about 95%. North America is the largest market, and has a share about 32%, followed by Europe and Japan with share 27% and 15%, separately. In terms of product type, Optical Inspection System is the largest segment, occupied for a share of 97%. In terms of application, SiC Substrate has a share about 73 percent.

The global SiC Metrology and Inspection Equipment market size was estimated at USD 1142.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 20.80% during the forecast period.
