Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Side Gusset Bag competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The Side Gusset Bag is a unique packaging form characterized by a foldable gusset on one side, which expands at the bottom to create a gusseted structure. This design provides increased space and enhanced stability for the contents of the bag. The gusset allows the bag to stand upright when filled, optimizing space utilization and reducing the amount of packaging material required. The bag's design not only facilitates operation on automated packaging lines but also protects the contents from damage during handling and transportation, ensuring safety.
