Report Overview:

A signal jammer is a kind of device which blocks reception or transmission of signals. Signal jammers have both malicious and benign uses. Military and the police often use them for the purpose of limiting or disrupting communications during the hostage situation, during bomb threats or when the military action is ongoing.

The jammer can cut off all wireless communication system equipment, as long as it is in a certain wireless frequency within the rate range (for example: within its specific radius). It transmits radio frequency waves to prevent specific communication equipment from establishing or maintaining connection communication.
