Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Silicon Rings and Silicon Electrodes for Etching competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The silicon parts for etching include silicon rings and silicon electrodes, and are mainly used on 8-12 inches (ie 200mm-300mm) plasma etcher. In the manufacturing process of integrated circuits, high-purity silicon components and wafers are made of silicon material, which makes the electrical properties of etching more uniform, so silicon component products are widely used in semiconductor etching machines. The periodic consumption of silicon components has become an important component consumable in the wafer processing process, which directly affects the electrical properties of the wafer. For example, a silicon ring needs to be replaced after processing about 200 wafers. Currently the silicon electrodes and rings are mainly produced in USA, South Korea, Japan, and China. North America is the largest producer, with a share about 54 percent. South Korea is the second producer of silicon electrodes and rings. China and Japan are the third and fourth producers. In next six years, China market will grow fastest. The major global manufacturers of silicon electrodes and rings include Silfex Inc., Hana Materials Inc., Worldex Industry & Trading, SiFusion, CoorsTek, SK Enpulse and Mitsubishi Materials, etc. The world's top ten manufacturers accounted for approximately 90% of the revenue. In terms of customers, OEM is dominating the market, hold a share nearly 70%. While in terms of Si parts size, the 12 inch silicon electrodes and rings are dominating market, have a share about 80%.

The global Silicon Rings and Silicon Electrodes for Etching market size was estimated

at USD 1728.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.30% during the forecast period.
