Abstracts

Silicone Edge Graphics Displays are a type of fabric-based signage system where printed graphics are mounted within a frame using a silicone strip sewn into the edges of the fabric. This silicone edge fits snugly into a groove in the frame, creating a taut, wrinkle-free display with clean, smooth edges. SEG displays are popular for their ease of assembly, high-quality print resolution, lightweight structure, and versatility in applications like trade shows, retail environments, and exhibitions. The fabric material used in SEG displays also allows for vibrant, full-color prints, making them an effective and aesthetically pleasing solution for large-format displays.
