Report Overview

Silver-loaded zirconium phosphate is a laminated zirconium phosphate carrier which has the advantages of high safety and heat resistance, good chemical stability and can be added to all types of resins to act as an antibacterial agent. It can provide efficient broad-spectrum sterilisation and removal of all types of bacteria. Due to the smaller particle size and better heat resistance of this inorganic antibacterial powder, it is particularly suitable for use in melt spinning of synthetic fibres (e.g. polyester, polypropylene, nylon, etc.) and in ceramic products where higher heat resistance is required.
