The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Single-End Dry Gas Seal Support Systems competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The single-end dry gas seal support system is a peripheral auxiliary system dedicated to single-face dry gas seals (Single-face Dry Gas Seal). It is mainly used to provide clean, dry, and stable pressure sealing gas for the seal body, and monitor and control its operating status in real time. The system usually integrates functional units such as sealing gas supply module, leakage gas monitoring module, and isolation gas module. It can be equipped with heating, liquid removal, pressurization, gas source switching and other subsystems to meet different working conditions. Its core goal is to ensure the formation of a stable gas film on the sealing end face, prevent process gas leakage, extend the sealing life, and improve the safety of equipment operation. The system is widely used in sealing occasions for environmentally harmless gases such as medium and low pressure compressors, air compressors, and nitrogen compressors.

The global Single-End Dry Gas Seal Support Systems market size was estimated at USD 664.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.20% during the forecast period.
