## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Single Phase Surge Arrester competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A Single Phase Surge Arrester is a surge protection device specifically designed to protect single-phase electrical systems (such as 120V/240V residential or small industrial equipment) from lightning strikes, switching surges, temporary overvoltages, etc. It is connected between the phase (hot) wire and the ground wire, and sometimes also between the phase and neutral wire - so if a surge occurs, the surge protector quickly transfers the overvoltage to the ground wire, thereby protecting sensitive equipment.

The global Single Phase Surge Arrester market size was estimated at USD 1831.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.90% during the forecast period.
