## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Single Stage Turbo Expander competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A single-stage turbo expander is a mechanical device that converts the energy of high-pressure gas into mechanical work by expanding the gas through a single turbine stage. It reduces gas pressure and temperature while generating rotational energy, which can be used to drive compressors or generators. Single-stage turbo expanders are widely used in cryogenic air separation, natural gas processing, refrigeration, and energy recovery systems. They are valued for their compact design, simplicity, and efficiency in small to medium-scale operations where precise temperature control and efficient energy conversion are essential for process optimization and operational cost reduction. In 2024, global sales reached approximately 0.8 k units, with an average global market price of around K US\$ 517 per unit. Upstream, production of single-stage turbo expanders relies on high-quality materials such as stainless steel, aluminum alloys, and precision components like impellers, rotors, bearings, and seals. Advanced CNC machining, dynamic balancing, and surface treatment technologies are essential. Key upstream suppliers include metal producers and precision engineering firms. Downstream, these expanders are used in air separation plants, LNG facilities, industrial gas systems, and cryogenic refrigeration processes. Major manufacturers include Atlas Copco, Cryostar, Air Products, and Turbogaz. Downstream industries such as oil & gas, chemical processing, and power generation rely on these systems for efficient energy recovery and temperature control.

The global Single Stage Turbo Expander market size was estimated at USD 441.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

4.70% during the forecast period.
