Abstracts

Single-use electronic cigarettes, also known as disposable vapes, are self-contained, non-rechargeable battery-powered devices pre-filled with e-liquid, designed for limited use until the e-liquid or battery is depleted, after which they are intended to be discarded. These products typically feature a compact, user-friendly design with no buttons or refillable components, appealing to convenience-seeking consumers, including both novice users and experienced vapers seeking portability and simplicity. They are characterized by their variety of flavors, nicotine strengths (often containing nicotine salts for smoother inhalation), and widespread availability in retail outlets and online platforms.

The global Single Use E Cigarettes market size was estimated at USD 18500.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 6.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Single Use E Cigarettes market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Single
