The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Single Zone Ductless Heat Pump Air Conditioner competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.Single zone ductless heat pump air conditioner is a high-efficiency cooling/heating air conditioning system that does not require air ducts. It consists of an indoor unit and an outdoor unit, which are connected by refrigerant pipes and are dedicated to providing temperature control for an independent space (such as a bedroom, office, studio, etc.). This system usually uses variable frequency compression technology, which has the advantages of high energy efficiency, low noise, and flexible installation. It is especially suitable for space renovation, new air conditioning areas, or building structures where traditional air ducts cannot be installed.
