### Report Overview:

Sintered Laminate is made of layers of woven wire mesh with different meshes and diameters through high-temperature sintering. Compared with stainless steel fiber felt, sintered laminates are more strength while compared with P/M products sintered laminates are more permeable. With high-temperature resistance, weldability, reusability, uniform aperture distribution, and long-lasting product life, sintered laminates are widely applied as filter media under high differential pressure and high temperature.

The Global Sintered Laminate Market Size was estimated at USD 148.29 million in 2023 and is projected to reach USD 220.06 million by 2029, exhibiting a CAGR of 6.80% during the forecast period.
