However, high cost of certain skin care devices is a key factor restraining growth of global Consumer Skin Care Devices market. Additionally, increasing incidence of side effects by use of specialized devices for skin care is a major factor expected to hamper growth of the global skin care devices market over the forecast period.

Additionally, increasing incidence of skin cancer and various skin disorders such as dermatitis, acne, psoriasis, skin warts, moles, and lesions is rising demand for innovative and technologically advanced skin care devices which in-turn is expected to provide numerous opportunities for major players in the market to expand their presence.
