Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Small Anaerobic Workstation competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The small anaerobic workstation is an integrated and modular laboratory equipment designed for simulating and controlling anaerobic environments. Its core function is to provide a stable and sterile experimental environment for anaerobic microorganisms (such as obligate anaerobes, facultative anaerobes) or cells that need to be cultured under anaerobic conditions through a precise gas control system (such as nitrogen, hydrogen, and carbon dioxide mixing ratio control) and a sealed cabin structure. The equipment is usually equipped with an oxygen removal module, a humidity control system, and a temperature control device. It can monitor and maintain the strict anaerobic state of the oxygen concentration in the cabin below 0.1% in real time. It also supports bare-hand operation or glove box-type sterile operation interfaces to ensure that the experimenter can complete operations such as sample inoculation, culture medium conversion, and microscopic observation without destroying the internal environment. Its compact design (such as an area of less than 0.5 square meters) and high-efficiency gas circulation system make it particularly suitable for space-constrained laboratory scenarios, and it is widely used in fields such as microbiology, medical research, food science, and environmental engineering, such as studying the metabolic mechanism of intestinal flora, anaerobic resistance analysis, or simulating the biodegradation process in low-oxygen environments of soil/water bodies.

The global Small Anaerobic Workstation market size was estimated at USD 61.8 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.
