The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Small Popcorn Machine competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A small popcorn machine is a compact appliance designed for making popcorn in smaller quantities, typically used in home kitchens, offices, or small events. These machines often feature a smaller kettle or popping chamber compared to commercial models and can make batches of popcorn quickly, usually ranging from 1 to 3 ounces of kernels at a time. They are powered either electrically or by stovetop heat and may come with features such as built-in stirring mechanisms and butter dispensers. Small popcorn machines are popular for their convenience, ease of use, and ability to produce fresh, crispy popcorn in just minutes. In 2024, global Small Popcorn Machine production reached approximately 925 k units, with an average global market price of around US\$ 205 per unit. The growth of the small popcorn machine market is primarily driven by the rise of home entertainment and healthy snacking trends, increasing demand for convenient, reusable kitchen appliances, and consumers' desire to replicate the movie theater experience at home. Modern families, especially those with children, are turning to small appliances that are easy to use and clean to make healthy snacks that are additive-free, low in sugar and oil. Furthermore, making fresh popcorn at home has become a popular leisure activity for gatherings and movie nights. The popularity of e-commerce platforms and the diversification of product designs have further lowered the purchase barrier, satisfying young consumers' demand for fun, personalization, and high value, and have collectively promoted the stable development of this category in the small household appliance market.

The global Small Popcorn Machine market size was estimated at USD 190.0 million in
