Smart Freight Elevators are equipped with latest technology such as Internet of Things (IoT), Artificial Intelligence (AI), cloud computing, and various hardware and software. These systems together allow for proactive, condition-based analysis, predictive maintenance, real-time data sharing, destination prediction, enhanced security, and many other features. A smart elevator is energy efficient, user friendly, secure and safe, and experience minimum downtime. Digital closed-loop maintenance, monitoring, and information systems are the future of elevator maintenance. More over, Green engineering is to deliver optimal performance by capturing excessive energy, which is often wasted in the form of heat. The system transfers the captured energy back into the building's electric grid for reuse in smart elevator market.
