Report Overview

The smart speaker with display market represents a growing segment within the broader smart home ecosystem, combining voice assistant functionality with visual interfaces to enhance user interaction. These devices integrate AI-powered voice assistants (e.g., Amazon Alexa, Google Assistant) with touchscreen displays, enabling multimedia consumption, video calls, smart home control, and visual feedback for queries. The inclusion of displays differentiates them from standard smart speakers by adding transactional capabilities (e.g., shopping carts, recipe steps), richer notifications, and improved accessibility. Major players like Amazon (Echo Show), Google (Nest Hub), and Meta (Portal) dominate the space, while Chinese brands (Alibaba, Baidu) drive adoption in Asia. The market is fueled by increasing smart home penetration, demand for multifunctional devices, and advancements in AI and display technology, though privacy concerns and competition from smartphones present challenges. Growth is further supported by rising use cases in kitchens, home offices, and elderly care, where visual interfaces add significant utility.

The global Smart Speakers with Displays market size was estimated at USD 9039.47 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 15.20% during the forecast period.
