Abstracts

Smartphone Voice Coil Actuator (VCA) is an electromechanical device used in smartphone camera modules to achieve precise autofocus and optical image stabilization (OIS). It operates based on electromagnetic induction, where a coil moves within a magnetic field to adjust the lens position with high speed and accuracy. VCAs enable real-time focus adjustments and compensate for hand movements, enhancing image sharpness and video stability. Due to their fast response time, low power consumption, and compact size, VCAs are widely used in modern smartphone cameras to improve photography and videography performance. Smartphone Voice Coil Actuator (VCA) market has witnessed steady growth in recent years, driven by increasing consumer demand for high-quality smartphone cameras. As mobile photography continues to evolve, manufacturers are integrating advanced VCA technologies to enable precise autofocus (AF) and optical image stabilization (OIS). Leading smartphone brands, including Apple, Samsung, and Xiaomi, are investing in innovative camera solutions, fueling the adoption of VCAs. Additionally, the rise of multi-camera setups and high-resolution sensors has further amplified the need for VCAs, as they provide rapid and precise lens adjustments. Currently, major VCA suppliers, such as Alps Alpine, Mitsumi, and TDK, are competing to enhance their product offerings, focusing on miniaturization, power efficiency, and improved performance. The market is also experiencing supply chain challenges due to geopolitical tensions and component shortages, impacting production costs and delivery schedules. Looking ahead, the future of the VCA market is expected to be shaped by advancements in artificial intelligence (AI) and computational photography. AI-powered autofocus and real-time scene optimization require actuators that can operate at higher speeds with greater precision. Furthermore, as foldable smartphones and under-display cameras gain popularity, the design and functionality of VCAs must adapt to new form factors and optical requirements. Another major trend is the push for sustainability, with companies

focusing on reducing rare earth material usage and improving energy efficiency in actuator components. The integration of periscope zoom lenses in flagship models will also drive further VCA innovation, as these setups require sophisticated stabilization and focusing mechanisms.

The global Smartphone Voice Coil Actuator (VCA) market size was estimated at USD 1107.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.40% during the forecast period.
