Abstracts

SMC insulation board is a glass fiber reinforced sheet molding material made of unsaturated polyester resin (UP), special yarn (GF), inorganic fillers, and various additives. It is a plate-shaped product formed by high-temperature compression molding. It has good electrical and mechanical properties, arc and leakage resistance, flame retardancy, as well as low smoke, non-toxic and flame-retardant properties. It also has low water absorption and stable size. SMC board products are widely used in the high, medium, and low voltage electrical industry, such as switch backplates, transformer coil supports, and automotive lamp head resistors. SMC board size and color can be customized according to customer requirements, which can minimize product costs.
