Abstracts

A smoke alarm is critical for the early detection of a fire in your home and could mean the difference between life and death. Fires can occur in a variety of ways and in any room of your home. But no matter where or how, having a smoke alarm is the first key step toward your family's safety. There are two main types of smoke alarms, which are categorized by the type of smoke detection sensor, ionization and photoelectric, used in the alarm. Each type of smoke alarm may perform differently in different types of fires. A smoke alarm may use multiple sensors, sometimes with a heat detector or carbon monoxide detector, to warn of a fire. Ionization detectors contain a chamber with two plates that generate a small, continuous electric current. When smoke particles enter the ionization chamber, the smoke particles disrupt the current flow, which triggers the alarm. Photoelectric detectors use a light beam and light receptor (photocell). When smoke particles are present between the light and receptor, depending on the type of smoke chamber configuration, the reduction or increase of light on the photocell sensor triggers the alarm. Properly installed smoke detectors save lives, and that may be the main reason why smoke detectors are mandatory at residential housing in many European countries. Today in Europe smoke detectors are mandatory at homes in Norway, Denmark, Sweden, Finland, Estonia, The United Kingdom, France, Ireland, Austria, Belgium, Germany and in the Netherlands. In future, the Europe market is driven by government policies. The governments in Europe have collectively or independently developed fire prevention and protection guidelines. There are strictly regulated European norms that every smoke detector manufacturer must abide by. Additionally, the government of the countries such as Austria, France, and Germany have mandated the installation of smoke detectors or smoke alarms in homes. Thus, increasing government regulations to safeguard building occupants from fire accidents is boosting the installation of smoke detectors in the European region. The key manufacturers of smoke detectors (smoke alarms) include Honeywell, Carrier, Resideo

(First Alert, Inc.), Ei Electronics, Google Nest, Johnson Controls, Swiss Securitas Group (Securiton and Hekatron), Bosch, Schneider Electric, Siemens, Hochiki, Nittan Group, and Nohmi Bosai Limited, etc. Among them, the leading giants have multiple sub-brands.
