Abstracts

Snail mucin facial products are skincare formulations derived from the secretion of snails (typically *Cryptomphalus aspersa*, or common garden snails), which is collected through a humane and controlled process that does not harm the animals. This mucin is valued for its rich composition of beneficial compounds, including glycoproteins, hyaluronic acid, glycolic acid, antimicrobial peptides, and antioxidants, which collectively provide moisturizing, skin-barrier repairing, anti-aging, and soothing properties. These products?commonly available as serums, creams, gels, and sheet masks?leverage the mucin?s ability to promote collagen production, improve skin elasticity, reduce inflammation, and accelerate wound healing, making them particularly appealing for consumers targeting hydration, acne scars, fine lines, and overall skin rejuvenation.
