A SOD Type Zener Diode is a Zener diode housed in a Small Outline Diode (SOD) surface-mount package. These diodes are designed for voltage regulation and protection in compact electronic circuits. According to the International Energy Agency (IEA), worldwide sales of electric automobiles had reached 17 million in 2024. Electric vehicles accounted for 9% of all vehicle sales worldwide. Zener diodes are used in the cooling fan drive of the Electric Vehicle battery management system. The increase in the use of Electric Vehicles boosts the Zener diode Market. The bolstering growth of the telecommunications industry, driven by the increasing demand for high-speed data transmission, expanding wireless networks, and the emergence of fifth-generation (5G) technologies, represent the key factor favoring the market growth. The industry heavily relies on Zener diodes to maintain stable voltage levels and protect sensitive components from voltage spikes and transients. In line with this, the growing need for reliable and uninterrupted communication services is further impelling the demand for Zener diodes in the sector. In addition to this, the expanding deployment of fiber optic networks and the increasing establishment of data centers are fueling the need for Zener diodes to ensure efficient power distribution and voltage regulation in telecommunications infrastructure.

The global SOD Type Zener Diode market size was estimated at USD 455.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.60% during the forecast period.
