Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Sodium Diisobutyl Dithiophosphate competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Sodium Diisobutyl Dithiophosphate is a chemical reagent used in mineral flotation. Its main ingredient is sodium diisobutyl dithiophosphate. As a collector, it selectively adsorbs onto the surfaces of sulfide minerals such as gold, silver, copper, and zinc, increasing their hydrophobicity and enabling effective flotation separation in mineral processing. Global production in 2024 was estimated to be approximately 110,000 tons, with an average selling price of \$2,100 per ton. The raw materials for the production primarily include phosphorus pentasulfide, isobutanol, and sodium hydroxide. Phosphorus pentasulfide is an important chemical intermediate, primarily composed of phosphorus and sulfur. It is significantly influenced by the phosphate rock and sulfur markets. Global manufacturers include Perimeter Solutions, Chemtrade, and Trecora. In recent years, with increasing environmental protection requirements, upstream raw material industries have also faced pressure to transform and upgrade, which may have a certain impact on the production cost and supply stability of Sodium Diisobutyl Dithiophosphate. The downstream application is primarily in the mining industry, particularly metal ore beneficiation. With the growing demand for processing complex co-existing minerals, polymetallic ores, and the increasing technical requirements for selectivity, pyrite suppression, and low-side effect collectors, the demand for Sodium Diisobutyl Dithiophosphate in the domestic and international mineral processing reagent market is stable.

The global Sodium Diisobutyl Dithiophosphate market size was estimated at USD 231.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

3.80% during the forecast period.
