The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Sodium-ion Start-Stop Battery competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A Sodium-ion Start-Stop Battery is a type of battery designed for automotive start-stop systems that uses sodium-ion (Na-ion) chemistry instead of traditional lead-acid or lithium-ion chemistries. These batteries are intended to provide reliable engine starting and energy storage for vehicles with start-stop technology, where the engine shuts off when the vehicle is idling (e.g., at traffic lights) and restarts quickly when the accelerator is pressed. In 2024, global Sodium-ion Start-Stop Battery production reached approximately 163.4 k units, with an average global market price of around US\$ 1241 USD per unit. global Sodium-ion Start-Stop Battery production capacity reached approximately 171.8 k units. The typical gross profit margin for Sodium-ion Start-Stop Battery is between 25% and 35%. The upstream of Sodium-ion Start-Stop Battery mainly consists of sodium-based raw material suppliers (such as sodium carbonate, phosphates, sodium chloride), electrode material and electrolyte manufacturers, and battery equipment and process technology providers, which supply the essential materials and technical support for battery development and production. The downstream includes automobile manufacturers, powertrain integrators, and start-stop system solution providers, who integrate sodium-ion start-stop batteries into conventional vehicles, hybrid vehicles, and commercial vehicles to enable automatic engine start-stop, energy saving, emission reduction, and regenerative energy functions.

The global Sodium-ion Start-Stop Battery market size was estimated at USD 203.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

6.90% during the forecast period.
