Abstracts

Sodium oxybate is a prescription medication used to treat two symptoms of narcolepsy: sudden muscle weakness and excessive daytime sleepiness. Sodium oxybate is predominantly used in the treatment of narcolepsy, a neurological disorder characterized by excessive daytime sleepiness and sudden loss of muscle tone (cataplexy). The growing prevalence of narcolepsy across the globe is a significant driver for the sodium oxybate market. There is an increasing awareness among patients and healthcare professionals regarding the symptoms and treatment options for narcolepsy. This has led to improved diagnosis rates, ensuring that more patients have access to appropriate treatments like sodium oxybate. Many countries have implemented favorable reimbursement policies for the treatment of narcolepsy. This makes sodium oxybate more affordable and accessible to patients, thereby driving its market growth. Advancements in drug delivery systems have improved the efficacy and convenience of sodium oxybate. The development of extended-release formulations or easy-to-use delivery devices has made the drug more attractive to both patients and healthcare providers. Pharmaceutical companies are investing in research and development activities to develop improved formulations and novel treatment options for narcolepsy. This includes the development of sodium oxybate-based combination therapies or innovative dosage forms, which contribute to the market growth. Rising healthcare expenditure, particularly in emerging economies, has led to improved access to medications for various medical conditions, including narcolepsy. This increased access to healthcare services has helped drive the demand for sodium oxybate. Sodium oxybate is also being explored for the treatment of other medical conditions, such as certain types of movement disorders. If approved for these additional indications, the market potential for sodium oxybate could expand further.

The global Sodium Oxybate market size was estimated at USD 132.0 million in 2025

and is projected to grow at a compound annual growth rate (CAGR) of 4.10% during the forecast period.
