Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Sodium Paratungstate competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Sodium paratungstate is a polyoxometalate composed of tungsten (W), oxygen (O), sodium (Na) and hydrogen (H). Its structure consists of a polyanion cluster consisting of 12 tungsten atoms (W) and 40 oxygen atoms (O) combined with 6 sodium ions (Na⁺). This structure gives sodium paratungstate high density and good water solubility. The density of sodium paratungstate solution can be as high as 2.9 g/cm³ (depending on the concentration), making it one of the highest density water-soluble inorganic salts known. Sodium paratungstate is a water-soluble, transparent, colorless solution. It is stable at room temperature and not easy to decompose. Compared with other high-density solutions (such as cesium chloride), sodium paratungstate has low toxicity and is suitable for biomedical applications. Sodium paratungstate is an important compound in the tungsten industry. Driven by the development of related industries, sodium paratungstate is expected to show a similar growth trend. Its market is likely to expand due to the increasing demand for high-performance tungsten-based materials in various fields. Asia-Pacific is a major region driving the growth of the sodium paratungstate market. Countries like China and India have a large demand for sodium paratungstate due to their rapid industrial development, especially in the fields of electronics, chemicals, and metallurgy. The Asia - Pacific region has a complete industrial chain and a large number of downstream application industries, which provides a broad market space for sodium paratungstate.

The global Sodium Paratungstate market size was estimated at USD 327.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10%

during the forecast period.
