## Abstracts

Sodium thiosulfate ( $\text{Na}_2\text{S}_2\text{O}_3$ ) is an inorganic compound, commonly available as a pentahydrate ( $\text{Na}_2\text{S}_2\text{O}_3 \cdot 5\text{H}_2\text{O}$ ). It's a white, crystalline substance that dissolves readily in water. It's known for its reducing properties and is widely used in various applications. Primarily, it's used in photography as a fixer to remove unexposed silver halides from film. It also serves as a dechlorinating agent in water treatment, a component in analytical chemistry, and a medication to treat cyanide poisoning. Its versatility makes it a valuable chemical in many industries. The sodium thiosulfate industry is experiencing a steady demand across its diverse applications, with trends reflecting both traditional uses and emerging needs. A significant trend is the ongoing use in water treatment, where its effectiveness as a dechlorinating agent remains crucial, especially as environmental regulations tighten. In the medical field, its role in cyanide poisoning treatment and as a component in certain pharmaceuticals ensures a stable demand. While the photographic industry has seen a decline in traditional film use, sodium thiosulfate still finds applications in specialized photography and certain industrial imaging processes. The chemical industry continues to utilize it in various analytical and industrial processes due to its reducing properties. Furthermore, there's growing interest in exploring its potential in environmental remediation, particularly in heavy metal removal and soil treatment. Manufacturers are focusing on improving production efficiency and purity to meet the stringent requirements of pharmaceutical and analytical applications. The industry is also adapting to ensure sustainable practices, including reducing waste and improving energy efficiency. Overall, the sodium thiosulfate industry is maintaining its relevance through its diverse applications and adaptability to evolving technological and environmental demands.

The global Sodium Thiosulfate market size was estimated at USD 842.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.60% during the
