Abstracts

Sodium Trideceth Sulfate is an anionic surfactant derived from ethoxylated tridecyl alcohol and sulfated to enhance water solubility, functioning primarily as a cleansing, foaming, and emulsifying agent in personal care and household cleaning formulations due to its mildness, effective dirt and oil removal, and compatibility with other ingredients. The market for Sodium Trideceth Sulfate is driven by rising consumer demand for mild, sulfate-based surfactants in skincare, haircare, and baby care products, as well as its application in eco-friendly and biodegradable cleaning solutions, with growth further supported by innovations in sustainable sourcing and production processes aligned with increasing regulatory and environmental standards. Key regional markets include North America, Europe, and Asia-Pacific, where expanding personal care industries and heightened hygiene awareness post-pandemic continue to fuel consumption, though competition from alternative surfactants and price volatility of raw materials pose challenges to market expansion.

The global Sodium Trideceth Sulfate market size was estimated at USD 320.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.25% during the forecast period.
