Abstracts

Soft plastic swimbaits are a type of artificial fishing lure made from flexible, soft plastic materials designed to mimic the movement and appearance of live baitfish. These lures are specifically engineered to resemble the swimming motion of baitfish, making them highly effective for attracting predatory fish species. Soft plastic swimbaits are often used in both freshwater and saltwater fishing for species like bass, pike, walleye, and various saltwater game fish. The soft plastic body allows for realistic movement in the water, and many swimbaits feature built-in or customizable rigging options, such as hooks, weights, or paddles, to optimize performance.
