Abstracts

A soft shell car tent typically refers to a portable and collapsible shelter designed to cover and protect a vehicle. Unlike traditional hard-shell car covers or garages, soft shell car tents are often made of flexible materials, such as polyester or nylon, supported by a framework of lightweight poles or other materials. These tents are designed to be easily set up and taken down, providing a convenient and portable solution for protecting a vehicle from various environmental elements. Soft shell car tents were incorporating more technological features, such as integrated LED lighting, USB ports for charging devices, and smartphone connectivity. These features enhance the overall camping experience and make the tents more versatile.
