Report Overview

Solar-powered cars are vehicles that are powered by electricity generated from solar panels installed on the car's surface. These cars use photovoltaic cells to convert sunlight into electricity, which is then stored in batteries to power the vehicle. Solar-powered cars are an innovative and environmentally friendly alternative to traditional gasoline-powered vehicles, offering reduced carbon emissions and lower operating costs. While still a niche market, advancements in solar technology and increasing concerns about climate change are driving interest in solar-powered cars as a sustainable transportation solution for the future.
