Report Overview

Solar sprayers are agricultural equipment powered by solar energy, designed to efficiently spray pesticides, fertilizers, and other agricultural chemicals on crops. These sprayers typically consist of a tank to hold the liquid, a pump to pressurize the liquid, a nozzle to spray the liquid, and a solar panel to provide the necessary power. The use of solar energy makes these sprayers environmentally friendly and cost-effective, as they reduce the reliance on fossil fuels and electricity. Solar sprayers are gaining popularity among farmers looking to adopt sustainable farming practices and reduce operational costs in the long run.
