Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Solid Alcohol competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global annual production capacity of solid alcohol reached 1.50 million tons, while actual output was approximately 1.23 million tons. The average global price was US\$980 per ton, and major manufacturers achieved gross profit margins ranging from 18% to 32%. Solid alcohol is a type of clean-burning solid fuel made by blending ethanol or methanol with a gelling or solidifying agent. It features clean combustion, low smoke, and ease of storage and transportation. It is widely used in portable stoves, catering heating, outdoor cooking, emergency heating kits, and military field applications. The upstream sector includes suppliers of fuel-grade ethanol or methanol, gelling agents such as calcium acetate and carbomers, stabilizers, and metal or composite packaging materials. The midstream consists of manufacturers?mainly in China, India, Southeast Asia, and Eastern Europe?that perform formulation blending, molding, drying, cutting, filling, and safety testing. The downstream market includes outdoor equipment brands, catering service providers, emergency-preparedness suppliers, military procurement channels, and retail home-heating distributors. End users emphasize flame stability, burn duration, safety, odor control, and compliance with clean-fuel regulations. The solid alcohol market is driven by the steady demand from the catering industry (especially hot pot catering) and the growing outdoor camping economy. The upgrade of food safety and environmental protection standards has promoted the replacement of traditional low-quality solid alcohol with clean-burning, low-smoke products. Raw material price fluctuations (e.g., ethanol price changes due to grain supply) pose challenges to manufacturers' profit margins. In emerging markets like Southeast Asia, the rising popularity of hot pot catering and outdoor activities has boosted market demand.

Manufacturers are focusing on developing eco-friendly, high-calorific-value products and optimizing packaging to reduce costs and enhance market competitiveness.

The global Solid Alcohol market size was estimated at USD 1460.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.80% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Solid Alcohol market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
