Abstracts

Solid Dielectric Materials are insulating materials that prevent the flow of electric current, thereby enabling the safe operation of electrical systems and components. Unlike liquid or gaseous dielectrics, solid dielectrics are typically used in applications where physical stability, durability, and electrical insulation are critical. These materials are non-conductive and have a high resistance to electrical breakdown, making them ideal for use in electrical and electronic devices. The major global companies of Solid Dielectric Materials include 3M, DuPont, Sakai Chemical, Weidmann, Rogers Corporation, Vibrantz Technologies, etc. In 2024, the world's top three vendors accounted for approximately 17.44% of the revenue. The solid dielectric materials market is experiencing steady growth, driven by advancements in power transmission, electronics, electric vehicles, renewable energy, and telecommunications. These materials are crucial for insulation, energy storage, and high-voltage protection, making them indispensable in modern industrial applications. The sales areas of Solid Dielectric Materials in various regions of the world are mainly distributed in North America, Europe, Asia-Pacific.
