Abstracts

Solid fiber packaging is an environmentally friendly packaging solution made of high-density pulp or fiber materials, usually used to protect fragile or high-value products (such as electronic products, glass products, cosmetics, etc.). Its manufacturing process presses the fiber material into a solid structure with good cushioning, compression resistance and shock resistance, which can effectively protect the product from damage during transportation and storage. Solid fiber packaging is recyclable and biodegradable, in line with the environmental protection trend of sustainable development, and gradually replaces traditional plastic foam packaging.

The global Solid Fiber Packaging market size was estimated at USD 6013.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Solid Fiber Packaging market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
