## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Solid-state Battery Laser Welding Machine competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A solid-state battery laser welding machine is specialized equipment used in the manufacturing of solid-state batteries to join battery components such as current collectors, tabs, casings, and protective layers using high-precision laser welding technology. Unlike conventional batteries, solid-state batteries employ solid electrolytes that require extremely tight sealing and precise joining to ensure safety, prevent leakage, and maintain high energy density. In 2024, global Solid-state Battery Laser Welding Machine production reached approximately 31 units, with an average global market price of around US\$ 1670 K USD per unit. The supply chain of solid-state battery laser welding machines mainly consists of three segments: upstream core components and materials, midstream equipment manufacturing, and downstream battery manufacturer applications. The upstream segment includes key component suppliers such as laser sources (fiber lasers, Nd:YAG lasers, ultraviolet lasers), optical components, precision motion control systems, and cooling systems. The midstream segment is composed of laser equipment manufacturers that integrate welding, drilling, and cutting modules into specialized solid-state battery welding machines, such as Yifi Laser Corporation, Hymson Laser Technology, and United Winners Laser. The downstream segment consists of solid-state battery companies and automotive manufacturers, such as CATL, BYD, and Toyota, which utilize the laser welding machines for electrode welding, electrolyte membrane welding, and battery packaging to enhance welding precision and consistency, ensuring efficient production under the high energy density and safety requirements of solid-state batteries.

The global Solid-state Battery Laser Welding Machine market size was estimated at USD 51.77 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.50% during the forecast period.
