Report Overview

Solution Dyed Nylon Carpet is a type of carpet made from nylon fibers that are colored during the manufacturing process, rather than after the fibers are formed. This dyeing method involves adding color to the nylon polymer before it is extruded into fibers, resulting in color that is consistent throughout each fiber. This process provides enhanced colorfastness, making the carpet resistant to fading from exposure to sunlight or harsh cleaning agents. Additionally, solution-dyed nylon carpets are known for their durability, stain resistance, and ease of maintenance, making them a popular choice for both residential and commercial settings.
