Abstracts

Soundproofing Windows are designed with multi-layer composite structures (such as double or triple insulating glass, laminated glass) combined with high-density sealing materials (such as EPDM strips, polyurethane foam filling) and other technologies to improve sound transmission loss and reduce the impact of external environmental noise on the interior. Soundproof windows are widely used in places with high requirements for quiet environment, such as residences, office buildings, hotels, hospitals, schools, etc., especially in busy traffic areas, airport surroundings and industrial noise environments. The global soundproofing windows market is experiencing significant growth, mainly driven by the accelerated urbanization process, improved building standards, and consumers' increased awareness of quality of life and environmental protection. The increasingly serious problem of urban noise pollution has increased the demand for efficient soundproofing solutions. At the same time, many countries and regions have implemented more stringent building energy-saving and environmental protection standards, further promoting the application of soundproofing windows. Technological innovations such as the application of new materials such as laminated glass and vacuum glass have not only improved the performance of soundproofing windows, but also reduced costs, meeting the market's demand for high-performance products. The soundproofing windows market is highly competitive with many participants. Major competitors in the market compete for market share through continuous technological innovation and product upgrades. The global major manufacturers of soundproofing windows include Andersen Windows, Cornerstone Building Brands, Pella Corporation, YKK AP, etc. In 2024, the global top five players hold a share approximately 40.52% market size. In the future, with the continuous development of new materials and technologies, the performance of soundproofing windows will be further improved, the cost is expected to be reduced, and the market demand will continue to grow. The government's support for green buildings and the

introduction of relevant policies will also further promote the healthy development of the soundproofing windows market.
