Report Overview

Spark arrestors are designed to prevent the risk of fire due to spark emissions from diesel engine exhaust systems. The primary range of spark arrestors can be used to replace the existing silencer; they will maintain sufficient noise attenuation for normal industrial use, with no significant increase in back pressure. Where further noise attenuation is required, the units can be fitted in series with a normal silencer.

Alternatively, a secondary range of simple add-on units are available for installation in conjunction with a standard exhaust system.
