Abstracts

In recent years, due to the diversification and individuation of cigarette products, the matching cigarette paper has gradually walked out of the situation of single function, and developed some cigarette paper with special functions. The cigarettes market size is projected to increase by USD 141.91 billion and the market size is estimated to grow at a CAGR of 3.75% between 2022 and 2027. Increasing demand for e-cigarettes is the key trend driving the growth of the market. E-cigarettes are electronic devices that stimulate the smoking experience. These operate by heating a liquid and creating an aerosol that the user inhales. The demand for e-cigarettes is currently high due to their wide penetration in various markets and is expected to increase during the forecast period due to new product launches. High regulation of cigarette smoking is the major challenge to the growth of the market. The rise in various types of taxes such as excise, value-added tax (VAT), and tobacco tax in North America, APAC, and Europe is a major concern for market players as it negatively impacts margins and profitability. For example, certain state laws prohibit the sale of herbal tobacco to consumers under the age of 18 (19 in Alabama, Alaska, and Utah), and retailers can charge USD 300 to USD 1,000 for violating the law.

The global Special Cigarette Paper market size was estimated at USD 1351.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.80% during the forecast period.
