Report Overview

Polyamides comprise a variety of polymers that are composed of repeating units linked together by means of amide linkages. Specialty polyamides is a sub-group of polyamides and comprises several polymers that exhibit relatively superior properties and performance across several applications. Relatively higher strength, rigidity, dimensional stability coupled with relatively superior chemical and thermal properties exhibited by these specialty polyamides, render them effective and efficacious alternative to conventional materials in several demanding applications. Some of the key polyamides that compose specialty polyamides market include PA 6/10, PA 6/12, PA 4/6, PA 10, PA 11, PA 12, among others.

Increasing focus on emission control has been witnessed in automotive industry over the recent past. This has prompted several of the industry participants to develop vehicles that are relatively lighter in weight. Metal-to-plastics conversion has been a prominent trend in the automotive industry over the past few years. Moreover, increasing demand for materials that exhibit better properties as compared to those exhibited by conventionally used materials in a variety of applications across diverse set of industries is expected to, in turn, drive the demand for specialty polyamides over the forecast period. Moreover, adoption of specialty polyamides, especially, in electronics application has witnessed a steady growth over the recent past. This coupled with anticipated steady growth in electronics production is expected to, in turn, drive the growth in consumption of specialty polyamides during the forecast period.
